PROFESSIONAL SUMMARY

Full Stack Web Developer with 11+ years of experience specializing in **PHP, WordPress, WooCommerce, Shopify, JavaScript, React.js, and Node.js**. Experienced in developing custom frontend and backend solutions, eCommerce platforms, themes/plugins, payment gateways, REST APIs, CRM and third-party integrations, Shopify Liquid customizations, and Laravel-based web functionality. Strong expertise in **frontend and backend development**, database-driven applications, performance optimization, end-to-end project management, team coordination, and client communication. Leverage **ChatGPT, Claude, and prompt engineering workflows** for planning, debugging, documentation, code assistance, and faster technical problem-solving.

EXPERIENCE

Satguru Technologies, Kharar, Mohali, Punjab, India

Sr. Web Developer

June 2019 – Present

- Lead development of **100+ WordPress, WooCommerce, and Shopify projects**, delivering custom themes, plugins, business logic, and eCommerce functionality for multiple client projects.
- Develop and manage **payment gateway, REST API, CRM, third-party service, and app integrations**, supporting complex business workflows.
- Build customized **Shopify Liquid solutions** with dynamic data and external API/app integrations.
- Worked with **Laravel** for web application development, feature implementation, and third-party integrations.
- Manage projects **end-to-end**, from requirements analysis and estimation through development, testing, deployment, and ongoing support.
- Lead and coordinate **development teams and client communication**, managing requirements, task allocation, technical decisions, and project delivery.
- Resolve **technical issues, migrations, performance, Core Web Vitals, SEO, and system enhancements** across long-term client projects.
- Provide **technical estimation, task planning, and project guidance**, ensuring alignment with project timelines.
- Use **Claude, ChatGPT, and prompt engineering workflows** to support planning, debugging, documentation, and faster technical problem-solving.

Web Developer

May 2015 – June 2019

- Developed and maintained **PHP-based websites and web applications** using PHP, MySQL, HTML, CSS, and JavaScript.
- Customized **WordPress themes, plugins, and WooCommerce functionality** based on project requirements.
- Built responsive frontend interfaces and implemented **backend functionality, database-driven features, and integrations**.
- Worked with **APIs, payment integrations, PrestaShop, and Joomla** across various client projects.
- Performed **testing, troubleshooting, optimization, website maintenance, and technical support** for client websites.

PROJECTS

Gourmet Direct gourmetdirect.co.nz

- **Tech Stack:** WordPress, WooCommerce, PHP, Windcave
- Developed custom **WooCommerce integrations** to streamline product and order management.
- Tailored the **Windcave payment gateway** to support user authorization and improve transaction security.

EZWindows ezwindows.com.au

- **Tech Stack:** WordPress, WooCommerce, PHP, JavaScript

- Customized WooCommerce to support both **standard orders and custom quote requests**.
- Developed a dynamic **PDF invoice generation system** with enhanced business branding.
- Built product customization functionality allowing customers to configure **product specifications before buying**.

Nash and Bank nashandbanks.com

- **Tech Stack:** Shopify, PHP, Gelato API
- Developed a **Shopify print-on-demand storefront** and integrated the Gelato API for automated order fulfillment.
- Built a custom **PHP API layer** to synchronize order status, notifications, and external system processes with Shopify.
